Software & Systems Engineering
Secretariat: CANADA (SCC)

ISO/IEC JTC1/SC7 N2986, 2003-02-23

Document Type Letter Ballot Summary
Title **New Proposal for the revision of TR14471-1999 Software Engineering - Guidelines for the adoption of CASE tools**
Source JTC1/SC7 Secretariat
Project **14471**
Status NWI
References N 2941
Action ID FYI or ACT
Due Date
Distribution SC7_AG; P, O & L Members
Medium Acrobat
No. of Pages 3
Note Updated 2004-03-08

Results (the compilation of results is given in the next page)
The following criteria for acceptance have been met: <input checked="" type="checkbox"/> Approval by a simple majority of the voting P-members <input checked="" type="checkbox"/> 5 or more P-members voting approval have agreed to participate in the development of the project and have nominated an expert <input checked="" type="checkbox"/> Approval by JTC1
The proposal is therefore: <input checked="" type="checkbox"/> Approved (all approval criteria met) <input type="checkbox"/> Not approved (one or more approval criteria not met)
Experts: TBD

Country	Comments
UK	No business requirement is identified in the document, nor is there any reference to current tools. The UK is not convinced that this NWI proposal is relevant to current market requirements. Currently, there is a Standard under development in SC7/WG6, ISO/IEC 25044 "Software engineering - Software product Quality Requirements and Evaluation (SQuaRE) – Evaluation process for evaluators" that covers Software Evaluation which is also applicable to CASE Tools. The UK favours the development of specific guidance proposed in this document within the more general framework of ISO/IEC 25044 (See also UK responses to 07N2941 and 07N2954). The proposal also mis-cites the title of ISO/IEC14598 as "Configuration Management" in section 4, References whereas it should be "Software engineering -- Product evaluation"
