UK	No support from Requirement Engineering Tool suppliers or software developers is indicated in the document. Currently, there is a Standard under development in SC7/WG6, ISO/IEC 25044 "Software engineering - Software product Quality Requirements and Evaluation (SQuaRE) – Evaluation process for evaluators" that covers Software Evaluation which is also applicable to Requirement Engineering Tools. The UK favours the development of specific guidance proposed in this document within the more general framework of ISO/IEC 25044.(See also UK responses to 07N2940 and 07N2941).
